PALM EXPO returns to the China International Exhibition Centre (CIEC) in 2011. With over 85,000 sqm of exhibition space, the show will once again meet exhibitors' ever increasing space demands.

INSTALL China, the country's premier event for audio visual installation and integration technologies and applications for residential and commercial projects, will take place alongside PALM EXPO. The exponential growth in demand for AV installations and system integration worldwide further establishes INSTALL China as the industry's platform to penetrate the multi-billion dollar Chinese market.
